

Web design & management service

We have over 10 years experience of designing professional and engaging websites. We always consider the function of the site and target audience, not just the design.

Our flexible service ranges from advice on layout and features, through to domain name registration, full design and maintenance.

We use standard editing programmes and do not tie our clients down with long-term contracts.

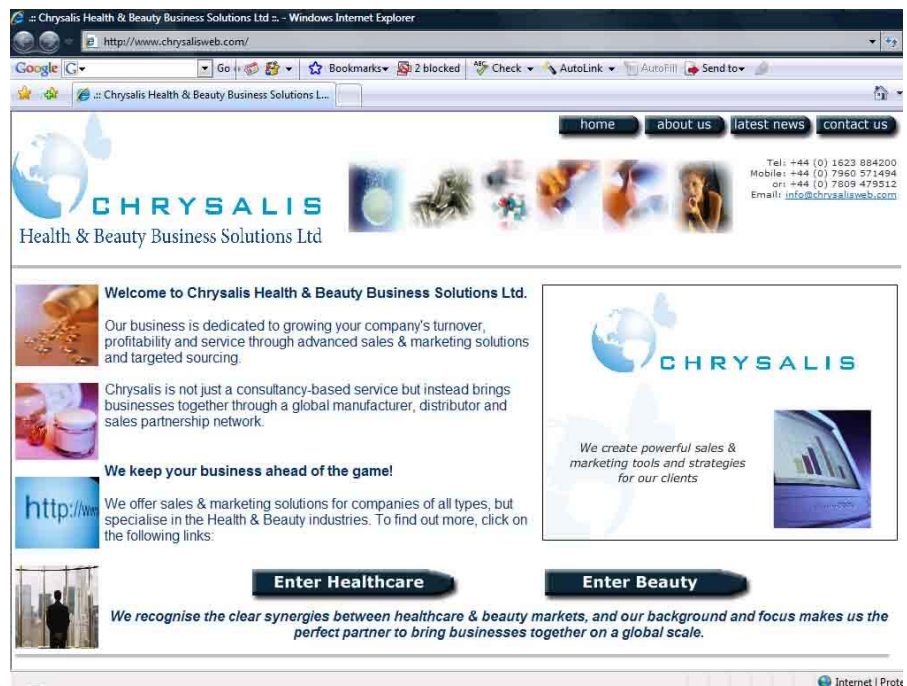

We charge in time only and offer 100% transparency with no hidden costs or extras.

We know several tricks to achieve high search-engine positioning, with a strong history of success.

Our flexible management service can range from occasional updates and housekeeping through to full ongoing support and evolution of your site.

Our experience of Health & Beauty markets makes us a great partner for this industry, but we can help companies of all types. Our past client base includes a wide range from Solicitors and Textile manufacturers, to Photographers and Chemical suppliers.

We are always available to discuss and advise on your website needs.
